# CYCLE SUCCESS PLAN

cycle labs

**Turn Your Test Automation Investment into Faster Business Results.**

Your team already has access to the Cycle platform. The Cycle Success Plan helps you get more from your investment by adopting new capabilities, modernizing execution, and continuously improving your test automation strategy.

Accelerate adoption of Cycle Intelligence, modernize your CI/CD pipelines with Cycle CLI containers, and work directly with Cycle experts to continuously improve a testing strategy that scales with your business.

The result is faster releases, less manual effort, and greater confidence in every deployment.

## Maximize Your Return on Cycle

### Accelerate AI-Powered Test Automation

Get hands-on guidance to adopt Cycle Intelligence, so your team can generate, maintain, and optimize automated tests faster.

- Turn business processes into executable tests
- Scale automation with AI-assisted test creation
- Reduce the effort required to maintain automated testing

### Build Faster CI/CD Pipelines

Use lightweight Cycle CLI containers to build faster, simpler automated testing pipelines.

- Faster pipeline startup
- Lower infrastructure costs
- Continuous execution for regression, smoke, web, terminal, and API testing

Our experts help your team stand up and optimize containerized pipelines for your environment.

## Work Directly with Cycle Experts

Success doesn't stop after implementation.

Complement product support with proactive guidance focused on adoption, optimization, and continuous improvement.

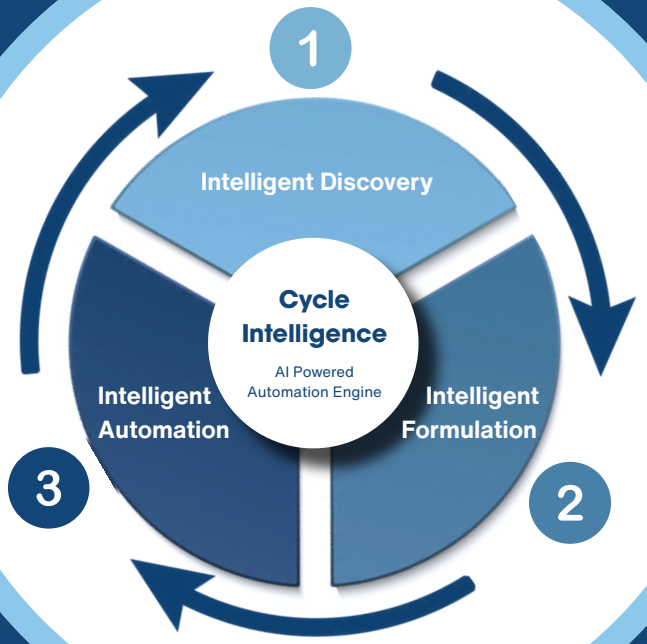

With the Cycle Success Plan, your Customer Success Manager and Cycle specialists help your team:

- Accelerate adoption of new capabilities
- Optimize testing strategies
- Apply best practices
- Keep your platform aligned with evolving business needs

## The Business Value

With the Cycle Success Plan, your team can:

- Protect and extend the value of your existing automation investment
- Accelerate value from new Cycle capabilities
- Increase adoption of Cycle Intelligence
- Simplify and modernize CI/CD pipelines
- Reduce manual testing effort
- Scale automation with confidence
- Keep pace with evolving applications and releases

# A Strategic Investment in Continuous Improvement

The Cycle Success Plan combines expert guidance, enablement, and technical best practices to continuously improve your testing strategy and maximize the value of Cycle.

**Maximize Your ROI.**
**Minimize Your Risk.**
**Accelerate Your Path to Value.**
